This document contains a general overview of the products and features described herein. All rights reserved to Belgo® Bearings and Belgo Industry

Thanks to our experienced engineering team who provides our bearings solutions for body makers, trimmers, decorators and necking systems and ensure you cost saving by providing the maximum performance and efficiency with our high technology products.

SPECIALTY BELGO® CAM FOLLOWERS AND BEARINGS FOR CANMAKERS

Special Bearings for Ragsdale Body Makers

We provide our BELGO® Spherical Plain Bearings and Cam Followers for Ragsdale Body Makers and ensure advanced technology for canmakers

Necker Cam Followers for Can Neckers

BELGO® Cam Followers with two rows of cylindrical rollers provide excellent lifetime to Needle Roller Cam Followers. You could easily extend your service intervals for the cam followers or roller bearings in your Ragsdale Body Makers.

Spindle Disk Cam Followers for Rutherford and Concord Can Decorator

Thanks to BELGO® Spindle Disk Cam Followers, you could also upgrade the performance of your Mandrel Support Arm Cam Followers in your decorator and increase reliability as well as decreasing your maintenance cost in through BELGO® Necker Cam Followers. Available both for Concord and Rutherford Machines. Precision for Dual-Race, Roller Cam

Keyless Locking Assembly

Excellent alternative product as single nut locking devices in your Necker which helps you to increase the efficiency in your applications. A keyless locking assembly that directly replaces the single nut bushing used to mount gears in the driveline of the necker. By this way, can makers have safer and easier operations in their applications.

Yoke Rollers for ANC Can Neckers

BELGO® Yoke Rollers with two rows of cylindrical rollers ensure long lifetime for ANC Can Neckers.

Special Connecting Rod Bearings for Standun Body Makers

BELGO® Special Spherical Plain Bearings with extended inner rings eliminate the need for spacers and facilitate the removal and installation.

Ceramic Bearings and Pillow Block Bearings for Pin-Ovens, High Temperature Applications

BELGO® Bearings ensure high temperature resistance for pin - ovens having high temperature background. (250 C°). Through BELGO® series ; UCP 210 (SS P210 stainless steel AISI304 hollow base), UC 210 Ceramic (white colour ZrO2) and SS F210 stainless steel AISI304 hollow base

Pin Oven Chains

Belgo pin oven chains offer a number of benefits: wear resistant and treated with our special lubricant, drip-proof, suitable for high-temperature applications by this way you could reliably and safely convey your cans.
